Logistics Services

Logistics Services

Warehousing

" Scalable warehousing with virtual stock visibility"

We offer 3PL – Third Party Logistics services to our customers, such as warehousing and transportation services, which can be scaled and customised to customer's needs, based on market conditions, demands and delivery service requirements for their products and materials. We can receive products from suppliers, warehouse the products and then distribute them according to our customer's requirements. WMS – our customised warehouse management system that allows smooth management of stock.

- Manage stock inventories for product distribution via WMS
- 3PL services for both local and international distribution services
- Network of secure bonded and non-bonded warehousing facilities
- Manage stock inventories for product distribution via WMS
- Flexibility to customise warehousing solutions
- Scalable warehousing and flexible pricing
- Option for sharing warehouse space

Value Added Services

"Extra benefits for extra efficiency."

Our value added services provide solutions that go beyond basic services. They complement and enhance warehousing, transportation and logistics services.

- Pick and pack services
- Shrink wrapping
- Labelling
- Repacking
- Stuffing and de-stuffing
- Configuration, testing and assembly services
- Inspection and verification services

Secondary Distribution

"Robust distribution system for optimised supply chain solutions."

Modes of distribution are mandatory for a smooth and successful supply chain. We offer transportation services that can be scaled and customised according to customer needs based on market conditions, demands and delivery service requirements. We offer seamless container logistics solutions between major ports and factories through last-mile connectivity. Our road safety policy, stringent vendor compliance criteria, accident audits and near miss audits help make health and safety a top priority.

- Local and international distribution services
- Undertaking product pick-up, warehousing and distribution responsibilities
- Full-service management - road, air, sea and sea/air freight forwarding products
- Strategic facilities connected by advanced technology
- Consulting and overseeing deliveries
- Rail services for export, import and domestic containerised cargo, integrated with road transportation, customs clearance, transit and bonded warehousing, refrigerated container facilities and other value added services
- Truck standardisation and maintenance
