

MASTERING THE ART OF SIMPLIFICATION

# SOPHISTICATED LOGISTICS FOR A GLOBAL LUXURY BRAND

## CHALLENGE

While all cargo is treated with the utmost care, some cargo needs to be given the red carpet treatment. For the past 10 years, 20 Cube Logistics Australia has been engaged by a global icon in the high-fashion world, where every item is a high-value masterpiece and requires specialist treatment – and heightened security – while in transit or when being stored.

## SOLUTION

### White glove handling in low dust environments

To preserve the pristine condition of these delicate items, we implemented white glove handling in low-dust environments. This meticulous approach ensures that even the slightest damage was avoided during the transportation process.

### Armoured delivery with armed guards and GPS tracking

For bespoke handbags and furniture items, we went above and beyond with armoured delivery services, complete with armed guards and GPS tracking, to ensure secure transit of high-value goods from point A to point B.

### Display preparation and dunnage essentials

Recognising the importance of presentation, we took charge of display preparation and dunnage proposals, ensuring that individual items delivered to stores were not just products in boxes, but ready-to-show masterpieces.

## RESULTS

20Cube Logistics Australia proudly served as an appointed customs broker, navigating the intricate customs landscape with precision and expertise. This enduring partnership attests to our unwavering commitment to excellence in luxury logistics and the hallmarks of our service:

- ✓ Security
- ✓ Cleanliness
- ✓ Speed
- ✓ Agility

## CONCLUSION

This is a partnership that goes above and beyond. Our team lodges Tariff Concession Order applications (TCO's), generates preferential tariff investigations, and manages refunds/drawbacks when inventory is relayed to client's locations internationally.
